

# *Hawaii*

This project was originally a 'code challenge' with two restrictions:

- 1) written in Swift 4+ and
- 2) to be "pretty"; which is quite subjective.

I came up with the 'Hawaii' theme, being that I had lived in Hawaii for about 17 years.

My ultimate goal is make this application useful as it is beautiful. The images are 'borrowed' from various sites including facebook; without any consent. This project is currently undergoing development; and for the time being, not intended for general distribution.
